

Export Packing Specification

Packing and container preparation reference for international MDF shipments.

PALLET PACKING

- MDF boards are arranged in protected bundles or pallet configurations according to order and shipment requirements.
- Bundle dimensions and packing configuration are confirmed before loading.

PROTECTIVE PACKAGING

- Board faces and edges are protected to reduce handling damage.
- Steel strap reinforcement secures finished bundles for container handling.

CONTAINER LOADING

- Packed boards are prepared according to the shipment plan.
- Container loading information is coordinated with the confirmed order quantity.
- Export shipment is coordinated through Tianjin Port, China.

PACKING CONFIRMATION	Before production or shipment preparation
LOADING METHOD	According to confirmed bundle and container plan
