

Xinyao Wood Thin MDF Quality Inspection Standard

Inspection-item reference for production monitoring and finished-board review.

SCOPE	Thin MDF boards manufactured for furniture, decoration, lamination, packaging and industrial processing
INSPECTION TIMING	Production monitoring, finished-board testing and final review before shipment
ACCEPTANCE BASIS	Confirmed order specification and applicable production requirements

THICKNESS INSPECTION

- Measure finished-board thickness against the confirmed order specification.

DENSITY TESTING

- Review finished-board density according to the agreed product requirement.

MOISTURE CONTENT

- Check moisture content as part of finished-board testing.

INTERNAL BONDING STRENGTH

- Review internal bonding performance for board reliability.

SURFACE QUALITY

- Inspect board faces for sanding condition, flatness and downstream processing requirements.

FINAL REVIEW

- Confirm specification accuracy, finished-board condition and packaging status before loading.

Document status: Manufacturer inspection-item reference. Numeric acceptance limits and order-specific requirements must be confirmed before production. This document is not third-party certification.
